

## 2018 European M18/W18 Beach Handball EURO

29 June – 1 July 2018 in Ulcinj / Montenegro

## Information about Ulcinj

Ulcinj is the southernmost city in Montenegrin coast and with it surface of 255 km<sup>2</sup> it represents a example of mixed beauty of the long sandy beach (the longest sandy beach in Europe), crystal pure sea, river Bojana, extraordinary "Shasko" lake and lush vegetation.

Ulcinj has got an extremely pleasant climate, so that in this way it can be compared to the most known Mediterranean tourist centers. Ulcinj is both an excellent summer and winter resort. Because of the mud region in area between Long beach and Salina, Ulcinj become important base for thousand of types of birds. Only during winter period In Salina You can find more than 20000 birds.

During winter in our Salina many types of birds are present, such as: pelicans, herons, ducks, cormorants, birds of prey and bird-singers. Due to the richness and diversity of birds in Ulcinj, as an ideal habitat or location for a temporary stay, Ulcinj occupies an important place on the European map of bird lovers and ornithologists. In this area you can enjoy the observation of about 240 species of birds, half of which is registered in Europe.
