GRUNDFOS 

The United Nations' Sustainable Development Goals need all the support they can get. At Grundfos, we care deeply about goals 6 and 13, which focus on making clean water and sanitation available to all and combatting climate change. To support these goals, we'll be donating a total of more than €25,000 to four different water and climate projects throughout the EHF Euro 2018 in Croatia.

On the next page, you can see the four projects receiving donations throughout the tournament. Grundfos will donate an amount of money to support the goal 6 and the goal 13 projects on each Grundfos Match of the Day.

For more information on the campaign and further press material, please visit grundfos.com/goal6and13

THE GLOBAL GOALS

For Sustainable Development

The 17 goals for sustainable development have been adopted by UN countries to end poverty, protect the planet and ensure prosperity for all. To reach these goals, we all need to contribute and take action.

6 CLEAN WATER AND SANITATION

TIMOR LESTE

A BRIGHTER FUTURE FOR WOMEN AND GIRLS

WaterAid/Tom Greenwood

Project by WaterAid

The project aims to build clean water systems in villages and teach sanitary practices. This will allow women and girls to spend more time on education – and less on collecting water from unsafe sources.

6 CLEAN WATER AND SANITATION

MALI

HEALTHY COMMUNITIES

WaterAid/Basile Ouedraogo

Project by WaterAid

This 4-year programme will improve water, sanitation and hygiene by building and rehabilitating water points and toilet blocks. It will also help 13 groups of young men and women to set up small businesses in water and sanitation.

13 CLIMATE ACTION

KENYA

WOMEN ENERGY ENTREPRENEURS

Practical Action

Project by Practical Action

This project helps 730 women in targeted areas of Central and Western Kenya to set up or expand small energy enterprises that make environmentally-friendly products available in poverty-stricken communities.

13 CLIMATE ACTION

PERU/BOLIVIA

SUSTAINABLE FORESTRY IN THE CLOUD FOREST

Practical Action

Project by Practical Action

The project provides training in sustainable production methods and explores new avenues of income for small coffee producers in the Cloud Forest, making them more resistant to climate change effects, such as low crop yields.

About Grundfos

Grundfos is a global leader in advanced pump solutions and a trendsetter in water technology. Securing clean water for all and saving energy to protect the environment is high on our agenda. To us and our 18,500 employees around the world, sustainability is not just something we talk about in our annual report – it's the very heart of our day-to-day business.
